16 Langevin relaxation							
H97 A restoring-force law for the kickoff...							useful · 6 cards
H125 The kickoff response is a damped...							
H127 Content trails a moving goal like an...							
H130 #51 agents are Ornstein-Uhlenbeck...							
H139 A fast read kick on a slow private...							
H141 Content moves on an easy plane set by...							
17 collective modes							
H12 Groupthink is dimensional collapse...							useful · 3 cards
H91 Eigenvector rotation as a...							
H92 RMT-cleaned matrices forecast...							
04 semantic info							
H01 Emergent superagents exist							partly useful · 12 cards
H15 Semantic information through natural...							
H35 The nudger is a measurably inefficient...							
H45 Context homeostasis: each agent keeps...							
H55 Norm-enforcers are the swarm's immune...							
H58 Effective superagents are coordinated...							
H60 An index policy beats the nudger							
H70 The semantic information of the...							
H71 Memory is a first-order homeostat							
H84 History-search outage as a...							
H87 κ table: commits per bit by channel							
H113 Read-out channel capacity: information...							
03 contagion							
H28 Links are the contagion vector of...							partly useful · 5 cards
H34 Idea cascades follow a power law whose...							
H61 Contagiousness is predictable at first...							
H62 Ideas travel the reply graph, not the...							
H68 Attention dilution is a mixture of two...							
15 stoch. thermo							
H75 A thermodynamic speed limit on...							partly useful · 7 cards
H76 Excess vs housekeeping irreversibility							
H77 Repos as replicators: the...							
H78 Replicator growth order: herding vs...							
H79 An artifact-only autocatalytic set							
H90 Collective entropy production beyond...							
H95 Speed-limit slack as a...							
14 scaling							
H85 Scaling of outputs with N							partly useful · 2 cards
H86 Taylor's law as a shared-field gauge							
08 copying							
H07 The RPG forks diverge from a common...							partly useful · 3 cards
H23 Distilling the village into a...							
H57 Copying beats transformation when the...							
06 neutral							
H06 Free weeks show neutral cooperative...							not useful · 1 card
10 Potts							
H11 Division of labor vs herding is the...							not useful · 17 cards
H17 Behavior is a Markov state model with...							
H27 Critical slowing down warns of herding...							
H31 Consensus time scales with the...							
H51 One dial: an effective coupling...							
H53 Herding is announcement-seeded...							
H63 Herding bursts start with a work signal							
H93 Project choice as a Brock-Durlauf...							
H94 Work allocation as a max-entropy...							
H126 Goal occupancy is a telegraph process...							
H128 Free kickoffs coarsen, named kickoffs...							
H133 Read-out Glauber Potts: an agent...							
H134 A Pólya-urn self-field holds an agent...							
H135 Max-ent allocation as the steady state...							
H136 Zero-temperature Potts freeze at the...							
H137 Nonreciprocal Potts: project hops...							
H138 Glauber escape from a project grows...							
13 conventions							
H88 Collective memory decays biexponentially							not useful · 2 cards
H89 Price equation for village culture							
framework and method cards (no primary model)							
H09 Agent swarms have an effective...							
H80 Assembly index vs compression as an...
