

Agent-swarm physics: how the project is architected

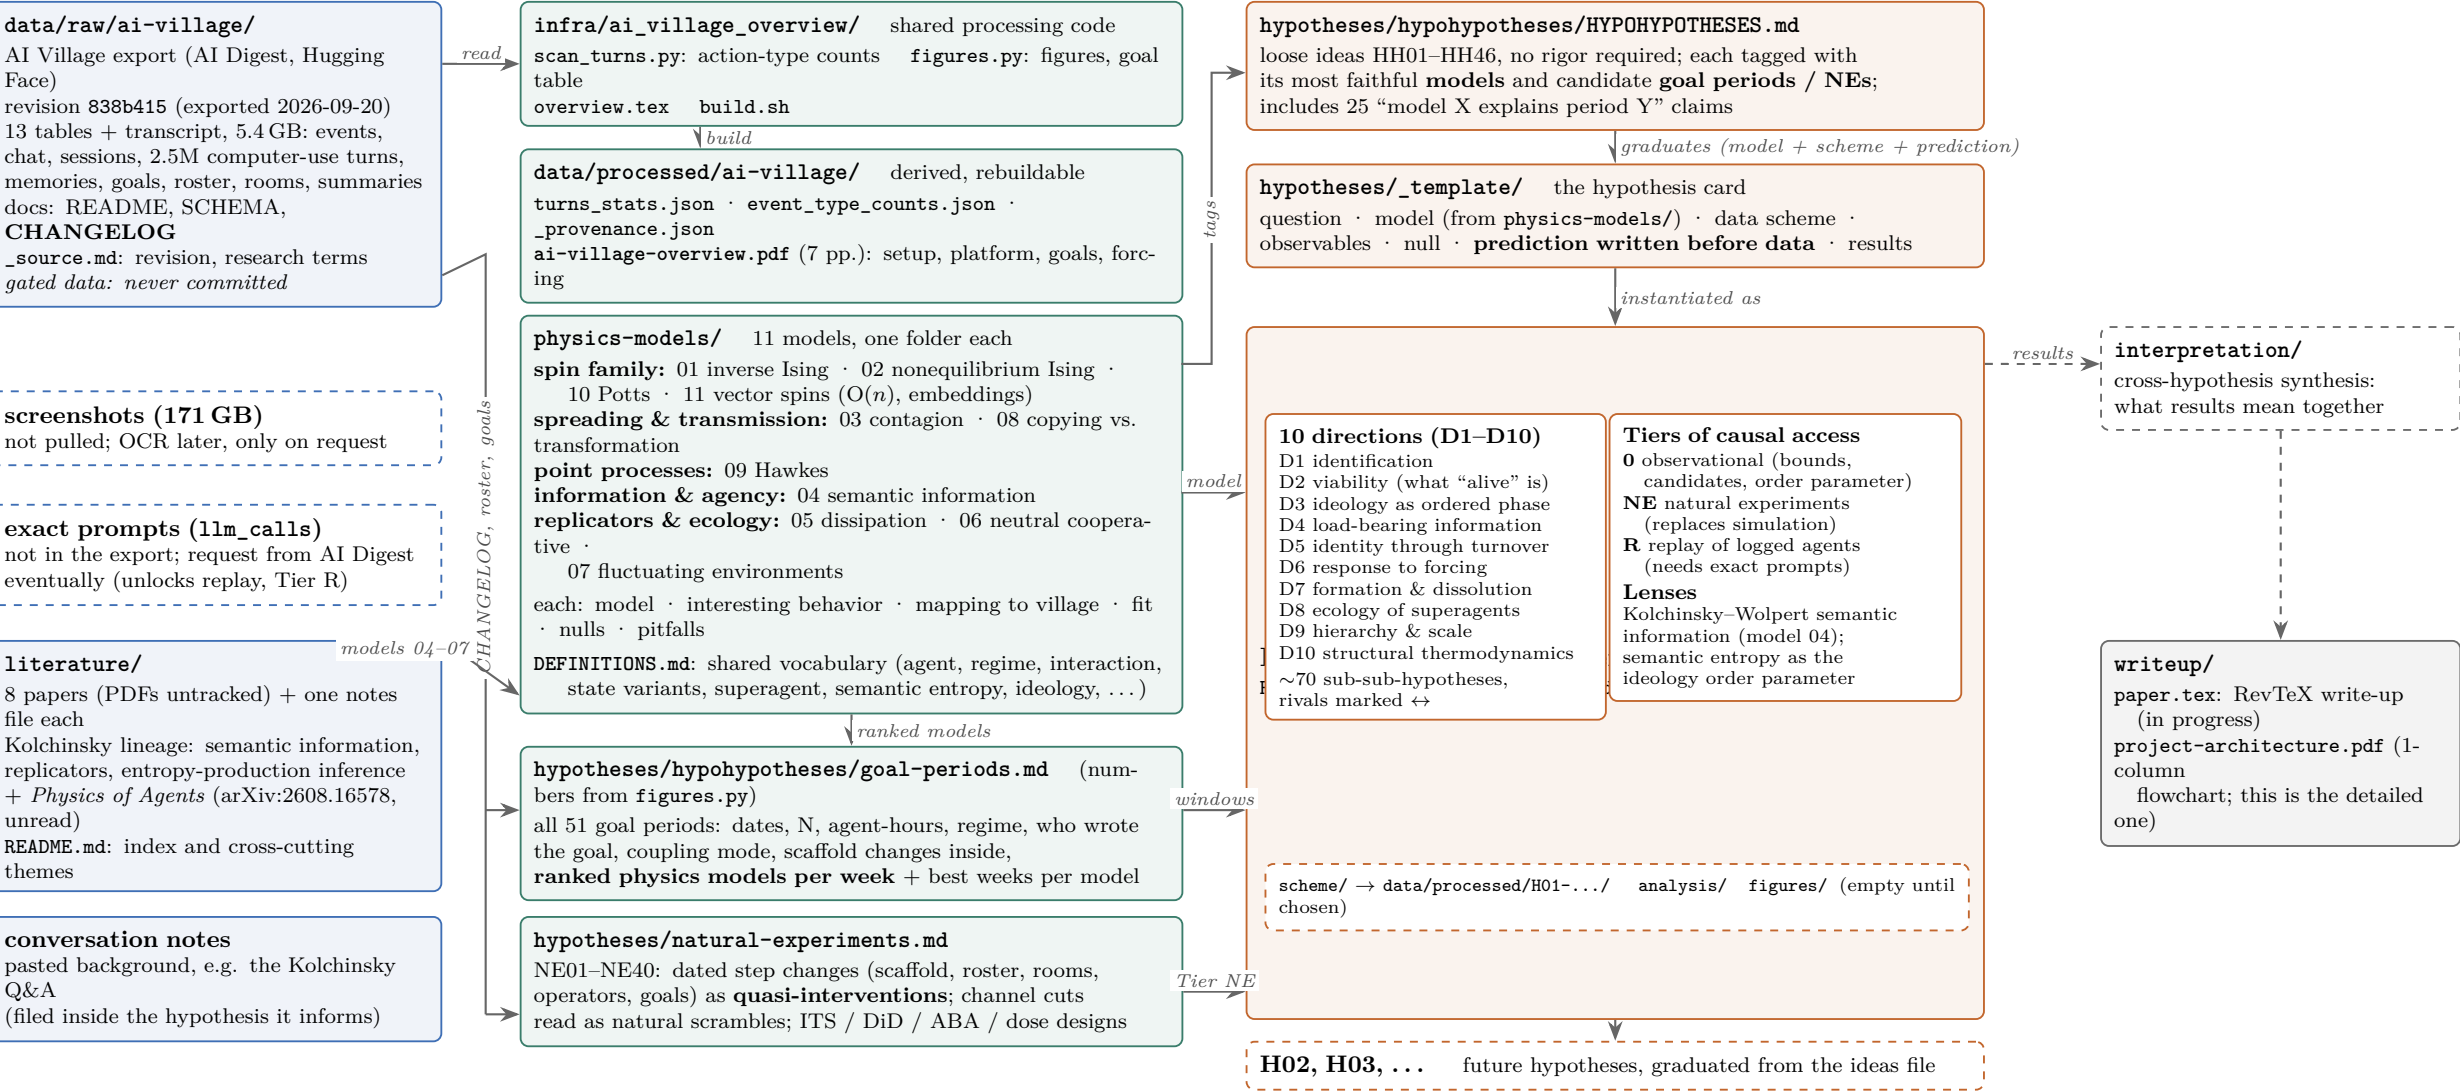

Vivian Rogers, with Claude Opus 5.5 · state as of 2026-10-03 · solid = exists; dashed = planned or empty · repo: agenttesting/

1 · Inputs

2 · Shared foundations

3 · Ideas → hypotheses

4 · Outputs

Runs through everything: CLAUDE.md project map & conventions · LOG.md dated lab notebook · git (data and PDFs ignored) · _provenance.json on every processed folder · regimes from the CHANGELOG in every over-time analysis · predictions before data · no heavy processing unless asked
