

H27 round 1: critical slowing down does not warn of herding onsets in the AI Village

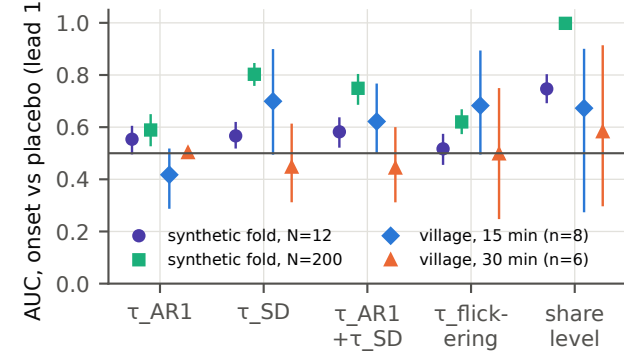

(a) Synthetic kinetic Potts at village sampling: only a large clean swarm approaching a fold warns

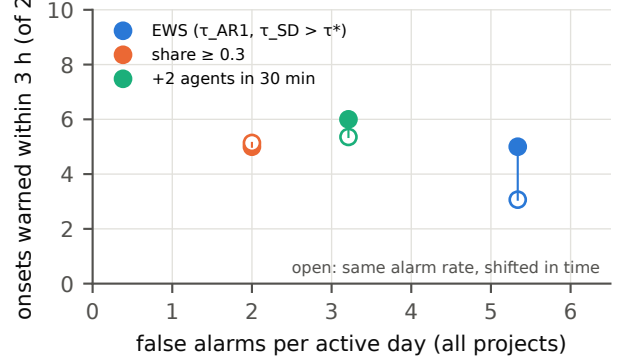

(b) #31 free week: four herding onsets (dashed); EWS alarms as ticks; two onsets come too early for 6 h of history

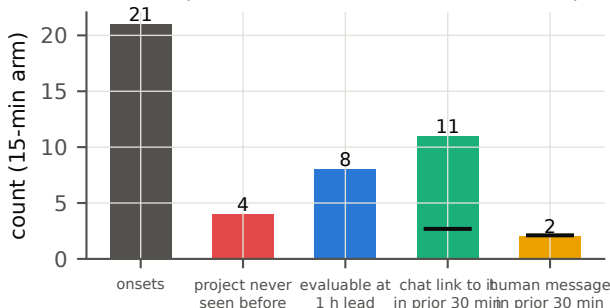

(c) Indicators: no AR1 rise anywhere

(d) Operator alarms vs rate-matched null

(e) What precedes onsets (black bars: within-period chance)

(f) Operating characteristics (15 min, 3-h horizon)

	EWS alarm	share ≥ 0.3
hits / onsets	5/21	5/21
alarm rate (per window)	3.5%	1.4%
precision (PPV)	1.4%	4.1%
base rate	0.54%	0.54%
rate-matched null hits	3.1 (p 0.07)	5.1 (p 0.66)
median lead of hits	1.25 h	2.50 h
30-min arm hits	0/21	4/21
