

# H72: Trap aging is input starvation

Vivian Rogers, with Claude Opus 5.5 · agent-swarm physics · Updated 2026-10-04

*not yet rated*

**Bottom line.** *Pending.*

level: hypothesis · pipeline checks 14% · updated —

## WHAT HAPPENED

*Not yet summarized. The question:* Does trap escape depend on time since the agent last read novel input rather than on trap age, so that aging disappears once input starvation is controlled?

## PHYSICAL MODEL

From: physics-models/|iNN-slug|/ |Which variant of that model this hypothesis uses, its parameters, and what it predicts here. E.g. "SIS with spontaneous adoption field  $\epsilon$ ;  $\lambda$ ,  $\gamma$ ,  $\epsilon$  fit per regime."

## SO WHAT? PRACTICAL VALUE FOR UNDERSTANDING AGENT SWARMS
