level: hypothesis · pipeline checks 43% · updated —

WHAT HAPPENED

Not yet summarized. The question: The response of the collective mode and of content alignment to operator and human messages, per message, tracked daily. Does steerability fall as the swarm ages within a goal? *Check:* daily χ_{op} from H04-style matched kernels; trend within goals; regime differences. Practical aim (usefulness-first batch): produce a number or rule an operator of an LLM agent swarm could compute from logs and act on.

PHYSICAL MODEL

From: 01, 11. The round-1 agent specifies the exact variant.

SO WHAT? PRACTICAL VALUE FOR UNDERSTANDING AGENT SWARMS
