

H33: no inverted U between agent-day content diversity and write output (round 1, non-holdout)

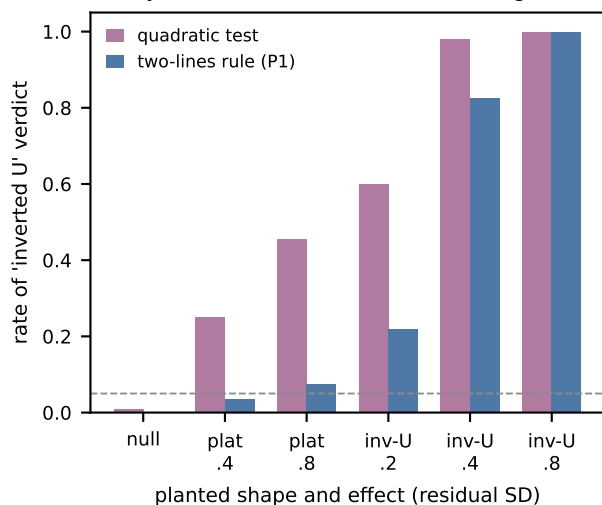

(a) pooled within agent x period and day: flat above PR10 ≈ 14

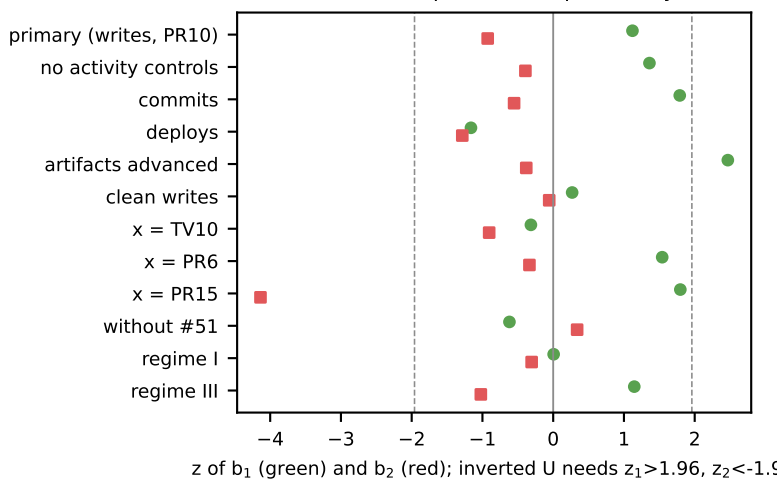

(b) per period: 0 supported, 3 mixed, 11 failed, 3 n/a

(c) synthetic validation at the real design (eiv)

(d) robustness, 11 specs (~ 1 at $p < 0.05$ by chance)

Day-blocked CV MSE: FE+controls 0.9467, +linear 0.9447, +quadratic 0.9471, +spline 0.9521.
Half-day cross-lag: PR→writes std +0.023 (p 0.36), writes→PR std +0.031 (p 0.30).
